Appendix K – SRG IT Accessibility

Proposal to install a wireless Broadband network into the Pavilion.

By providing a wireless network it would provide:-

- Access to internet/email for attendees to meetings.
- Online reporting for Cricket and Football teams.
- Remote control of heating to reduce substantial expenditure on gas costs (more research is required as our current energy supplier does not provide this function).
- Remote access to CCTV for prevention and detection of crime / security.
- Door entry system – video / bell for security.
- Fire / Security alarm monitoring.
- Online card payments (potential future cafe' / shop).
- Faxing of documents.
- Ordering of supplies/essential goods.
- Complies with access to internet agenda for visitors and residents.
- Need to consider access arrangements / password / router operation times.

----------oOo----------

Cost

There is a telephone line already installed so no upfront costs to consider.

PlusNet – Unlimited Business Fibre Broadband with Pay as you go calls will cost £21.99 + VAT per month (Broadband £11.49 Line Rental £10.50) on a 24 month contract.

Annual cost = £263.88 net of VAT.

BT – Broadband Essential – monthly costs of £29.50 + VAT with £20 upfront installation cost and £8.50 delivery charge - 24 months contract.

Recommendation to source other providers and explore contract requirements (i.e. Clerk to sign on behalf of Council) then proceed with installation.
